

QUANG LONG

WEB DEVELOPER FRESHER

/ ALL ABOUT ME

With many years studying, practicing and working at many different projects during my college and programming center time, I myself have researched and figured out the principles of many current technologies. With the aim of becoming a fullstack-developer, I look forward to having a chance to work as a long-term employee at the company. I believe that with the ability to learn quickly and acutely, not only I can completed my assigned tasks but also can do much better than what the company expected to.
